OTHER CERTIFICATES

Neutralizes the ESD effect (Electrostatic Discharge), which is caused by an imbalance of voltage between energy-charged objects in contact with people: it's a discharge that only lasts a few seconds, but it can cause imperceptible damages in certain equipment at first instance. For example, during the production of electronic or electromagnetic devices such as microchips or magnetic tapes, any electrostatic discharge can cause damage.

The REACH certification guarantees that our models do not contain or are within the limits of chemical substances prohibited or restricted by EC Regulation No. 1907/2006 of the European Parliament and the Council, concerning registration, evaluation, authorization and restriction of chemical substances and mixtures (REACH), which comprises more than 100 different substances.

Assessed by the Assessment Service INESCOP as favourable in tests such as: Visual inspection, weight, dimensional assessment, flexibility, slip resistance, antistatic properties, shock absorption, insulation from the cold, sweat management and usage.

INTRODUCTION
